

BELOW GRADE WATERPROOFING WITH NUDURA ICF

Long-term waterproofing performance

Below-grade waterproofing is critical to the long-term performance of any structure. In addition to a complete line of compatible primers, drainage, protection courses and sealants, Tremco and Nudura together as part of Tremco Construction Products group (CPG) are uniquely positioned to be your single-source for high-performance solutions for **all six sides of the building enclosure**. From the foundation to the roof, and everything in-between.

Building with Nudura Insulated Concrete Forms (ICF) allows for an expedited construction schedule while offering an eco-friendly structure with substantial benefits that contribute to long-term energy savings.

TREMdri™ 160

TREMdri™ 160 is a flexible waterproofing membrane, roller-applied or spray-applied to seal out water penetration on Nudura ICF walls.

Features & Benefits

- Seamless monolithic weatherproofing membrane
- Exceptional ability to hang on the ICF wall and build targeted thickness, spanning below grade foundation wall cracks of up to 1/8" (3 mm) with a cured thickness of 60 mils
- Extreme durability with exceptional elongation and crack-bridging characteristics

TREMdri™ 540

TREMdri™ 540 is a self-adhesive waterproofing membrane specifically designed for below grade dampproofing or waterproofing applications.

Features & Benefits

- Manufactured to a preset, uniform thickness that provides consistent and uniform coverage
- Primerless dampproofing when applied over Nudura ICFs
- When used as a waterproofing application, the full surface is required to be primed with the Nudura membrane primer prior to application

ACCESSORIES

Tremco® 2450 Protection Board

An extruded, hollow-core polypropylene/polyethylene copolymer board commonly used in residential waterproofing which provides protection from normal construction traffic or waterproofing membrane.

TREMDrain™ DPI Drainage and Protection Board

An optional drainage, protection and insulation board designed for use with a residential spray-applied waterproofing membrane.

Nudura Membrane Primer

Polymer emulsion-based primer designed to improve the adhesion of self-adhesive waterproofing membranes on most substrates. Particularly recommended when the use of solvent-based primer is not advised.
