

# NUDURA Project Profile

Snyder Residence - Possum Kingdom, Texas

## FAST FACTS

- The incorporation of ICF along with a carefully sealed attic and quality doors and windows are synergistic in this sustainable design leading to significantly lower energy bills than neighboring houses of the same size
- One of the biggest reasons why the homeowners chose to go with ICF is the energy efficiency
- This project undertook a very extreme wildfire that surrounded the house just after completion. While returning to the house after the fire subsided they found all exterior landscaping burned and damaged, but inside was no trace of smoke and no change in temperature.

## PROJECT STATISTICS

**Location:**

Possum Kingdom, Texas

**Type:**

Small Residential

**Size:**

Undisclosed

**ICF Use:**

3,100 sq ft

**Cost:**

Undisclosed

**Total Construction:**

200 Days

**ICF Installation Time:**

10 Days

## CONSTRUCTION TEAM

**Owner:**

Mel & Brenda Snyder

**General Contractor:**

Mel & Brenda Snyder

**Form Distributor:**

Cameron Ware

**ICF Installer:**

Double Eagle Builders, LLC

**Architect:**

Undisclosed

**ICF System:**

NUDURA Inc.
