

Environmental, Health and Safety Policy

Nudura Inc. is part of the Construction Products Group - TREMCO and in this context adheres to the Group's Environment, Health and Safety Policy.

At the same time, Nudura Inc. is committed to preserving the environment and promoting energy-efficient solutions through a product line focused on the future of sustainable construction, namely the manufacture of insulated concrete forms (ICF), which allow credits to be accumulated in various categories of LEED environmental assessment systems.

The company's management promotes the health & safety and preservation of the environment as a key concern for each employee working in its offices and its manufacturing and product storage facilities.

At the Granby sites, we are committed to:

- Maintain a clean and safe work environment.
- Implement programs that promote continuous improvement in employee health & safety and pollution prevention through the communication of this policy to our employees and its availability to our stakeholders, the training of our employees, the awareness of our suppliers and subcontractors, the periodic review of targets and the maintenance of an ISO14001 accredited environmental management system.
- Any incidents involving health & safety or environmental impacts are promptly reported to management with high priority and are investigated to find the root cause and implement corrective and preventive measures.
- Comply with applicable legal and other health, safety and environmental requirements.
- Our activities are carried out with the aim of keeping our water consumption and waste production to a minimum, using clean energy and promoting energy efficiency in our practices.

Nudura Inc. is committed to standards and practices that promote environmental protection and pollution prevention.
