

DON'T FORGET... THE #10 SCREW!

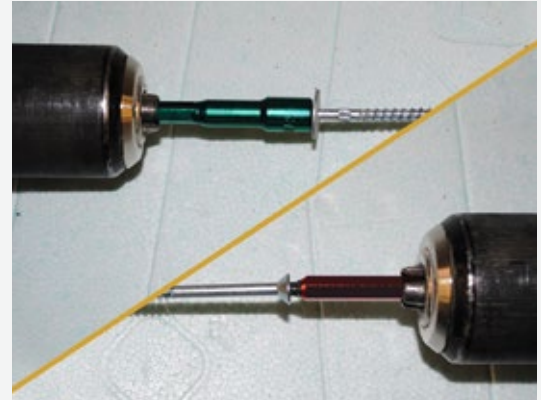

Assure your wall alignment system and temporary shuttering is secured safely with the #10 screw! The hex head design allows for efficient assembly for workers who need a job done quickly and safely. Available in 2" (50 mm), 2 1/2" (64 mm), and 3" (76 mm) lengths. Two 1/4" (6 mm) nut drivers included per pail.

Codes to order:

Size	"10 x 2" (50mm)	"10 x 2.5" (64mm)	"10 x 3" (76mm)
Qty./Box	1000	1000	1000
Code #	SC-2.0	SC-2.5	SC-3.0

The #10 screw can be used to connect the NUDURA Alignment System to the forms. Other uses include attachment of strapping or buck material to concrete.

NOW AVAILABLE:

The NUDURA 10 piece quick change bit kit. The durable plastic case keeps all the bits together in one convenient spot which eliminates trying to find driver bits on site during construction.

Code to order: BITKIT

Ten piece kits include five 1/4" magnetic nutsetters which can be used with any of NUDURA's Hex Head Screws with Steel Flat Washers, as well as five #2 red square driver bits. Comes in packages of 12 and is perfect for point of purchase display for showrooms.
