

NUDURA Project Profile

TC Cherry Elementary School - Bowling Green, Kentucky

FAST FACTS

- A new 55,554 square foot state-of-the-art elementary school
- School was built adjacent to the existing 58-year old school using NUDURA Insulated Concrete Forms
- Third new school constructed for the Bowling Green Independent School District during the past nine years
- Solar water heating system
- Mechanical system that offers individual climate controls in each classroom
- Solatubes installed in each classroom for natural daylighting - electronically controlled and tied into the overall building lighting system
- Mechanical and electrical systems tie to a "Vital Signs" graphic interface that displays the building's power, water and natural gas consumption rates.
