March 17, 2020

Dear Customers,

We are closely monitoring the Coronavirus outbreak and are proactively managing any potential impact on our ability to supply you while maintaining a safe work environment for our employees. The current assessment by our global team is that our ability to maintain adequate production levels and service to our customers is not in jeopardy.

Our plants remain in full operation while non-essential Tremco Construction Products Group staff (Tremco, Dryvit, Nudura, Willseal, WTI and WTC) will be working remotely, and will stay connected to one another and to you. Please continue to reach out with questions by email and phone during normal business hours.

In addition to remote working for all non-essential staff, other precautions that we are taking:

- Banning all non-essential work-related travel
- Increasing cleaning and sanitization of high touch areas
- Banning all non-essential outside visitors; for essential visitors such as contractors, enacting policy for screening and/or temperature scanning

As the situation with COVID-19 evolves, our plans may alter too. Know that as we work together through this unprecedented event, we will continue to provide the strong support and service you have come to know and rely on for your business.

Please know that we are thinking of you and hope that you and your families stay safe and healthy during these uncertain times.

Sincerely,

Francois Beauchesne, President
