10" (254mm) Version	NUS-ARPDD-10
12" (305mm) Version	NUS-ARPDD-12

Product Description

Nudura RPD Dovetail Insert is designed to slide into the dovetails on the inside of the form to support vertical reinforcement where support does not already exist. The RPD Dovetail Insert is manufactured from galvanized steel and is 1" (25 mm) wide. There are multiple reinforcement bar positioning locations which are 7/8" (22 mm) wide and a minimum of 1 3/8" (35 mm) long (length of holes varies depending on size of insert). This product is designed to ensure a minimum 3/4" (19 mm) concrete coverage from the side of the foam, which is the minimum coverage as dictated by ACI regulations.

Basic Uses

The RPD Dovetail Insert is designed to support the two vertical bars required at the side of an opening, eliminating the need to tie wire or zip tie these bars in place. Other uses include supporting vertical reinforcement in a wall using fiber reinforcement (if vertical reinforcement is required), in a column or cage, at center to center locations which differ from increments of 8" (203 mm) o/c, or any other area where the vertical reinforcement needs additional support.

Storage

Store the RPD Dovetail Inserts in their original, undamaged packaging in a clean, dry location.
