

EXHIBIT

Subject to the terms, conditions, and limitations stated in this warranty, the Company warrants to the Owner:

Warranty No.: [Project Number]-[Warranty Number]

Insulated Concrete Forms and Specialty Insulation

Nudura ICF Series and Nudura Plus Series:

That the Product(s) 1) will provide insulation to the minimum R-value level of R22 (RSI 3.87, U-Value 0.25) for the Nudura ICF Series and Nudura Plus Series and R35 (RSI 6.16, U-Value 0.16) for the Nudura XR35 Form Option, and 2) will obtain a sound transmission class (STC) rating of a) at least 50 when constructed as a wall assembly in accordance with Company's wall assembly testing to ASTM E336 for concrete cores of 6 inches (152 mm) or greater, or b) at least 42 for concrete cores of 4 inches (102 mm), for the period stated in the table below from the Date of Project Substantial Completion.

Nudura One Series:

That the Product(s) 1) will provide insulation to the R-value level of R13 (RSI 2.28, U-Value 0.43) for the Nudura One Series, and 2) will obtain a sound transmission class (STC) rating of a) at least 50 when constructed as a wall assembly in accordance with Company's wall assembly testing to ASTM E336 for concrete cores of 6 inches (152 mm) or greater for the period stated in the table below from the Date of Project Substantial Completion.

Nudura Integrated Series:

That the Product(s) will provide insulation to the minimum R-value level of R3.8 (RSI 0.66, U-Value 1.51) per 1 inch (25 mm) for the Integrated Series for the period stated in the table below from the Date of Project Substantial Completion.

Additional Terms and Conditions:

Notwithstanding anything to the contrary in this warranty document, a watertight condition is not warranted unless the Product(s) are used in conjunction with approved Company Waterproofing Applications/Systems or Air and Water Resistive Barrier Systems.

The Company's obligations and Owner's rights shall be void if the Product(s) are subjected to any misuse or abnormal use or conditions, including but not limited to, abnormal soil pressures, abnormal climatic conditions, or any settlement, compression, or deterioration that is not the result of gravity.
